Item # WP-EA, Extreme High Abuse Wall Panel

Extreme High Abuse Wall Panel

Acoustical Wall Panels by Noisemaster® are the solution for areas that require noise reduction and are available in a variety of models for various applications.

The WP-EA Wall Panel is manufactured specifically as an extreme abuse absorber panel that offers both excellent absorption and high durability. Application for the WP-EA panels includes gymnasiums, schools, universities, prisons, recreation centers and any area where excess reverberation and high abuse resistance is required.

WP-EA Extreme Abuse Wall Panels are manufactured using a high impact fire rated perforated rigid PVC vinyl sheet with edges that are bent and welded to provide protection over the 1" or 2" fiberglass absorber. Panels are available in 20+ standard colors with custom colors available. WP-EA panels are available in 1 1/16" and 2 1/16" thickness with sizes up to a maximum of 4' x 8'.

WP-EA panels can be quickly installed using a 2 part mechanical clip.
