Item # WP-R, Reflective Wall Panel

Reflective Wall Panel

Acoustical Wall Panels by Noisemaster® are the solution for areas that require noise reduction and are available in a variety of models for various applications.

The WP-R Wall Panel is manufactured specifically as a flat reflector panel that offers sound reflection. Application for the WP-R panels includes auditoriums, concert halls, churches and any where sound reflection is necessary to enhance the room acoustics.

WP-R Reflective Wall Panels are frequently used in conjunction with our WP-I absorber panels. The combination of both the WP-I and WP-R panels provides both the absorption and reflection necessary to enhance the room acoustics by reflecting and absorbing excessive sound thereby improving the quality of sound and speech understanding.

WP-R panels are manufactured with an MDF core in thickness to match WP-I panels or standard thickness of 1/2", 5/8", and 3/4" with sizes up to a maximum of 4' x 10'. The edges are fully wrapped in standard, designer or C.O.M. fabric with 4 edge detail options.

WP-R panels are lightweight and easily installed on walls with a two-part mechanical clips or nails and construction adhesive.

SPECIFICATIONS

Thickness	1/2 in 3/4 in 5/8 in
Max. Size	4 x 10 ft
