Type 6" RSC/DBL

6" RSC/DBL - Double Sided

Originally designed for the New York City Transit Authority, the 6" RSC Double Sided Acoustical Masonry Unit has the unique ability to absorb noise from both the front and rear face shells. With a Noise Reduction Coefficient of .65 - .75, the 6" RSC Double Side can be the right choice for interior partitions where space is at a premium. Suggested applications include classrooms, music rooms and factories, in fact, any application where superior sound absorption is required and lower labor costs are desired.
